

ENVIRONMENTAL POLICY

Ioannina Plant

The company "**THRACE PLASTICS PACK**" - **Ioannina Plant**, considers that the Environment protection is one of the main challenges that today is facing. Recognizing the importance of protecting the natural environment in safeguarding the present and the future, we believe that sustainable development and environmental responsibility are not only an important parameter for our operation but also a cornerstone of our socially responsible behavior.

In this context, we have established, implemented and maintained an Environmental Management System according to the requirements of the International Standard **ISO14001: 2015** and the requirements of program **Operation Clean Sweep** and we are committed to continually improving and monitoring environmental performance and the effective management of losses of plastic pellets using appropriate indicators.

In this context, of its Environmental Policy, the Company's management is committed to:

- Provide all the necessary means to be fully comply with the legal and other requirements governing the operation of the Ioannina plant and the handling of plastic pellets.
- Recognize and evaluate the environmental aspects and impact of its activities.
- Create and publish internal procedures to achieve the "zero loss of plastic pellets" goals.
- Provide appropriate environmental training to employees as well as training and responsibilities to employees for the prevention, containment, cleaning of plastic pellet spills and their disposal.
- Aim to prevent pollution by emphasizing the reduction of pollution at source and the conservation of natural resources.
- Use energy rationally in all of its functions and proper management and reduction of plastic pellet losses.
- Recheck and revise environmental aims and targets.

- Improve its environmental performance as well as the Environmental Management System and the current **Operation Clean Sweep** program.
- Communicate Environmental Policy to employees, suppliers, customers, public services and the community in which it operates.
- Improve the organization of facilities to prevent and deal with leaks.
- Encourage its business partners (contractors, transporters, etc.) to pursue the objectives of the **Operation Clean Sweep** program.

Especially, the Environmental aims are:

- **The environmentally friendly design of our products.**
- **Reducing our Energy Environmental Imprint.**
- **The optimal and rational management of waste arising from the plant's activities.**
- **The prevention, reduction, cleaning and proper management of plastic pellets.**
- **Promoting recycling**
